Ship Operations in the Bay

Sat, November 26 1pm-2pm

Join Captain Craig Thomas of Agile Marine as he provides a better understanding of commercial shipping operations and movements in the Bay. Program includes the types of ships, ship construction and layout, commercial considerations, types and locations of terminals in the Bay Area, manning requirements including careers and International, U.S. and California Regulations. A typical voyage for a tanker and container ship will be tracked from outside the bay, into a terminal, carrying out cargo operations and departing to sea towards the next port.
