

**Hamilton Army Airfield Wetland Restoration Feasibility Study  
Table of Contents**

Executive Summary..... i

List of Acronyms..... iv

1.0 INTRODUCTION..... 1

    1.1 Purpose and Scope..... 1

    1.2 Study Authority..... 1

    1.3 Prior Studies and Reports..... 1

    1.4 Planning Process and Report Organization..... 2

2.0 PROBLEM IDENTIFICATION..... 4

    2.1 General..... 4

    2.2 Study Area Description..... 4

        2.2.1 Existing Conditions..... 7

        2.2.2. Future Conditions without a Project ..... 22

    2.3 Problems and Opportunities..... 22

        2.3.1 Wetland Development..... 22

        2.3.2. Dredged Material Disposal Requirements..... 23

    2.4 Planning Constraints..... 27

        2.4.1 Threatened and Endangered Species in Existing Wetlands..... 27

        2.4.2 Novato Sanitary District Facilities..... 27

        2.4.3 Dredged Material Suitability..... 28

    2.5 Planning Objectives..... 28

        2.5.1 Wetland Restoration..... 28

        2.5.2 Elimination of disposal impacts through reuse of  
            dredged material..... 28

        2.5.3 Facilitate Base Closure..... 29

        2.5.4 Public Access..... 29

3.0 PLAN FORMULATION..... 30

    3.1 Introduction..... 30

    3.2 Management Measures..... 30

        3.2.1 No Action..... 30

        3.2.2 Real Estate Parcels Considered..... 30

        3.2.3 Modification of Site Elevation..... 31

## Table of Contents

3.2.4 Dredged Material Off-Loading Alternatives.....	33
Deep Water (-16 ft MLLW) location in Western San Pablo Bay.....	35
Shallow Water (-6 to -8 ft MLLW) location in Western San Pablo Bay.....	35
Dredging a Deep Water (-16 ft MLLW) temporary access channel near the site .....	35
Dredging a Shallow Water (-6 to -8 ft MLLW) temporary access channel near the site .....	35
3.2.5 Novato Sanitary District Facilities.....	36
3.2.6 Levees .....	37
3.2.7 Internal Peninsulas.....	37
3.2.8 Breach Alternatives Considered.....	38
3.2.9 Additional Measures.....	38
3.3 Array of Final Alternatives.....	38
3.3.1 Basis for Final Alternatives.....	38
3.3.2 Plan Alternatives.....	38
Alternative 1 - No Action.....	38
Alternative 2 - Wetland Restoration at the Airfield and Navy Ballfields Via Natural Sedimentation.....	39
Alternative 3 - Wetland Restoration at the Airfield and Navy Ballfields Via Beneficial Reuse of Dredged Material.....	39
Alternative 4 - Wetland Restoration at the Airfield, Navy Ballfields & SLC Property Via Natural Sedimentation..	39
Alternative 5 - Wetland Restoration at the Airfield, Navy Ballfields and SLC Property Via Beneficial Reuse of Dredged Material.....	39
4.0 COMPARISON OF ALTERNATIVES.....	44
4.1 Comparison of Plan Features.....	44
4.2 System of Accounts.....	44
4.2.1 Methodology.....	44
4.2.2 National Economic Development (NED).....	48
4.2.3 Environmental Quality (EQ).....	48
4.2.4 Regional Economic Development (RED).....	49
4.2.5 Other Social Effects (OSE).....	50
4.3 Incremental Analysis of Project Features.....	50
4.3.1 Introduction.....	50
4.3.2 Cost Effectiveness/Incremental Cost Analysis.....	52
4.3.3 Relationship of Incremental Analysis Conclusions to the Study Alternatives.....	55

## Table of Contents

4.4	Associated Evaluation Criteria.....	56
4.4.1	Completeness.....	56
4.4.2	Effectiveness.....	56
4.4.3	Efficiency.....	58
4.4.4	Acceptability .....	59
4.5	Trade-off Analysis.....	60
4.5.1	Display of Relative Rankings.....	60
4.5.2	Trade-offs between Alternatives.....	60
5.0	THE SELECTED PLAN.....	62
5.1	Plan Description.....	62
5.1.1	Construction and Restoration Timing.....	62
5.1.2	Site Prep and Placement of Dredged Material.....	64
5.1.3	Placement of Dredged Material.....	66
5.1.4	Lowering Bayward Levees.....	67
5.1.5	Evolution of Site.....	68
5.2	Summary of Benefits.....	74
5.3	Environmental Requirements and Commitments.....	74
5.3.1	Water Resources Council Environmental Requirements.....	74
5.3.2	NEPA Compliance.....	74
5.3.3	Clean Water Act.....	74
5.3.4	Fish and Wildlife Coordination.....	75
5.3.5	Endangered Species Act.....	78
5.3.6	Coastal Zone Management Act.....	78
5.3.7	Cultural Resources Compliance.....	78
5.3.8	Resources of Principle National Significance.....	79
5.3.9	Environmental Commitments.....	79
5.4	Real Estate Requirements.....	79
5.5	Engineering Requirements.....	80
5.6	Operation, Maintenance, Repair, Replacement and Rehabilitation Requirements.....	80
5.7	Summary of Costs.....	81
5.7.1	Basis of Cost.....	82
5.7.2	Incremental Costs.....	82
5.7.3	Interest During Construction.....	87
5.7.4	Cost Apportionment & Allocation.....	87
5.8	Risk and Uncertainty.....	89
5.8.1	Uncertainty in projections.....	89
5.8.2	Value Engineering initiatives.....	90

## Table of Contents

5.9 Project Implementation.....	92
5.9.1 Construction Funding.....	92
5.9.2 Funding Requirements by Phase.....	93
5.9.3 Financial Capability of the Sponsor.....	93
5.9.4 Permits.....	95
6.0 PUBLIC INVOLVEMENT, REVIEW AND CONSULTATION.....	96
6.1 Report Circulation, Public Meetings and Workshops.....	96
6.2 Feasibility Study Involvement.....	96
6.2.1 Institutional Involvement.....	96
6.2.2 Study Team.....	96
6.2.3 Hamilton Restoration Group.....	96
6.2.4 Coastal America Partnership.....	97
6.3 Views of the local-sponsor.....	97
7.0 CONCLUSIONS AND RECOMMENDATIONS.....	98
7.1 Conclusions.....	98
7.2 Recommendations.....	98

## TABLES AND FIGURES

Table and Figures	Page
Chapter 2.0 - PROBLEM IDENTIFICATION	
Tables	
Table 2.1 Special Status Species Observed at HAAF .....	9
Table 2.2 Tidal Characteristics at HAAF .....	12
Table 2.3 Potential Sources of Maintenance Dredging Material .....	25
Table 2.4 Potential New Work Project Material Volumes .....	26
Figures	
Figure 2.1 Site Plan .....	5
Figure 2.2 Regional and Site location Map .....	6
Figure 2.3 Existing Elevations on the Project Site .....	11
Figure 2.4 Hamilton Wetland Restoration Existing Drainage During Low Flow Conditions .....	13
Figure 2.5 Regional Drainage Features.....	15
Figure 2.6 Hamilton Wetland Restoration Existing Drainage During Flood Conditions .....	19
Figure 2.7 Schematic Stratigraphic Column in Shallow Soil on Runway at HAAF .....	20
Figure 2.8 Conceptual Settlements Estimates .....	21
Chapter 3.0 - PLAN FORMULATION	
Figures	
Figure 3.1 Dredging Material off-Loader and Pipeline Routes .....	34
Figure 3.2 Alternative 2: Restoration of Wetlands in the HAAF Parcel through Natural Sedimentation, at Maturity.....	40
Figure 3.3 Alternative 3: Restoration of Wetlands in the HAAF Parcel Use Dredged Material, at Maturity.....	41
Figure 3.4 Alternative 4: Restoration of Wetlands in the HAAF and SLC Parcels through Natural Sedimentation, at Maturity.....	42
Figure 3.5 Alternative 5: Restoration of Wetlands in the HAAF and SLC Parcels Using Dredged Material, at Maturity.....	43

## Table and Figures

### Chapter 4.0 - COMPARISON OF ALTERNATIVES

#### Tables

Table 4.1 Comparison of Alternatives.....	47
Table 4.2 Summary of Costs.....	47
Table 4.3 Summary of Environmental Quality Account.....	48
Table 4.4 Regional Economic Development and Other Social Effects.....	49
Table 4.5 Comparison of the FWS HEP and the Modified HEP.....	52
Table 4.6 Incremental Cost/Cost Efficiency Analysis, First Iteration.....	53
Table 4.7 Incremental Cost/Cost Efficiency Analysis, Second Iteration.....	53
Table 4.8 Incremental Cost/Cost Efficiency Analysis, Third Iteration.....	54
Table 4.9 Incremental Cost/Cost Efficiency Analysis, Fourth Iteration.....	54
Table 4.10 Comparative Ecological Efficiency of the Study Alternatives.....	59
Table 4.11 Responsiveness of the Study of Alternatives to Local, Regional and Federal Plans.....	60
Table 4.12 Relative Rankings of the Study Alternatives by Study Objectives and Evaluation Criteria.....	61

#### Figures

Figure 4.1 Levee Segments for Alternatives 2 and 3, and 4 and 5.....	45
Figure 4.2 Typical Levee Cross Sections.....	46
Figure 4.3 Hamilton Wetland Restoration Incremental Analysis.....	55
Figure 4.4 Habitat Acreage's at Levee Breach and 50 years after Breach.....	57

### Chapter 5.0 - THE SELECTED PLAN

#### Tables

Table 5.1 Selected Plan Compliance with Water Resources Council Environmental Requirements.....	75
Table 5.2 FWS DCAR Recommendations, Part 1.....	76
Table 5.3 FWS DCAR Recommendations, Part 2.....	76
Table 5.4 Effects on Resources of Principle National Significance.....	79
Table 5.5 Summary of Costs for the Selected Plan.....	81
Table 5.6 New Work Dredging Projects being Considered.....	84
Table 5.7 Dredging Material Types, Sources and Incremental Costs O&M Projects (Medium Size Projects).....	86
Table 5.8 Dredging Material Types, Sources and Incremental Costs New Work Projects, Corps of Engineers.....	87
Table 5.9 Interest During Construction, Alternative 5.....	88
Table 5.10 Hamilton Restoration Study Cost Apportionment.....	88
Table 5.11 Project Schedule.....	93
Table 5.12 Funding Requirements by Phase.....	93

## Table and Figures

### Figures

Figure 5.1	Timeline Comparison, Tidal Wetland Creation.....	63
Figure 5.2	Temporary Drainage Weirs.....	65
Figure 5.3	Sedimentation Curves for the Natural Gradient Alternative .....	69
Figure 5.4	Natural Gradient Alternative Initial Conditions: Site Template At Year T+0 .....	70
Figure 5.5	Natural Gradient Alternative Evolution At Year T+10 .....	71
Figure 5.6	Natural Gradient Alternative Evolution At Year +50.....	72
Figure 5.7	Schematic of Habitats by Tide Levels.....	73

## Appendices

Section	Page
Appendix A - List of Prior Studies and Reports	
Appendix B - Engineering Appendix	
1.0 Introduction.....	1
2.0 Hydrology and Hydraulics.....	1
2.1 Hydrology.....	1
2.1.1 Climate and Wind.....	1
2.1.2 Regional Hydrology.....	4
2.1.3 Local Hydrology.....	6
2.1.4 Hydraulic Modeling.....	14
2.1.5 Sedimentation and Site Evolution.....	15
3.0 Surveying and Mapping.....	18
4.0 Geotechnical.....	20
4.1 Regional Geology.....	20
4.2 Geology at Hamilton.....	21
4.3 Geotechnical Conditions.....	21
5.0 Project Design.....	25
5.1 Introduction.....	25
5.2 Principal Site Engineering Aspects.....	26
5.2.1 Perimeter Levees.....	26
5.2.2 Internal Peninsulas.....	31
5.2.3 Borrow Materials and Volume Need.....	32
5.2.4 Levee Breaches and Pilot Channel.....	35
5.2.5 Design Elements that Minimize Mosquito Breeding.....	36
5.3 Channel Characteristics and Site Drainage.....	37
5.3.1 Channel and Inlet Features.....	37
5.3.2 Site Drainage During Construction.....	42
5.3.3 Surface Drainage Changes.....	42
5.4 Existing Infrastructure and Utilities.....	43
5.4.1 Novato Sanitary District Facilities.....	43
5.4.2 Drainage System Facilities.....	47
5.4.3 Other Facilities.....	47
5.4.4 Real Estate.....	48
5.4.5 Relocation.....	48
5.5 Dredge Material Placement, Phasing, and Site Elevations....	48
5.5.1 Seasonal Wetlands and Upland Corridor.....	49
5.5.2 Tidal Wetlands Site.....	53
6.0 Conceptual Maintenance, Monitoring & Adaptive Management .....	57
6.1 Introduction.....	57

## Appendices

Section	Page
6.2	Levees..... 57
6.2.1	Monitoring..... 57
6.2.2	Maintenance..... 59
6.3	Hydraulics..... 59
6.3.1	Monitoring..... 59
6.3.2	Maintenance..... 61
6.4	Water Quality..... 61
6.4.1	Monitoring and Maintenance..... 61
6.5	Biological Resources..... 61
6.5.1	Monitoring..... 61
6.5.2	Maintenance..... 63
6.6	Adaptive Management..... 63
7.0	Access Roads..... 64
8.0	Preliminary Cost Estimates..... 64
8.1	Basis of Cost..... 64
8.2	Assumptions..... 66
8.3	Contingency Percentages..... 68
9.0	Schedule for Design and Construction..... 70

### Appendix C - Real Estate

Real Estate Exhibit A - Schedule Real Estate Milestones

Real Estate Exhibit B - Real Estate Requirements Map

Real Estate Exhibit C - Assessment of Non-Federal Sponsor's Real Estate  
Acquisition Capability

### Appendix D - Section 404(b)(1) Evaluation

### Appendix E - Draft Coordination Report

### Appendix F - Bibliography
