

Highlights, Decisions and Tasks

LTMS Science Group Meeting 11/18/08

Future Meeting Dates

Dec 18, 9:30-12:00

Jan 28, 9:30-12:00

Announcements/Updates

Thomas Jabusch will be presenting his results of the Water Quality Literature Review at the December LTMS Science Group meeting. Bill will provide a link to the literature review to the Science Group email recipients.

Status of the Framework

1. Jessica H. has incorporated comments on the Updated Framework document and will provide Bill a copy of the latest draft.
2. Comments on the Updated Framework document will be provided to Jessica H. before the December Science Group meeting.

Fish Tracking Update

1. Equipment has been received and arrangements made for deployment. We're in the final stages of receiving equipment and preparing for deployment. Monitors should be deployed in late November.
2. There was considerable discussion whether the LTMS should fund monitors at private marinas. David stated that data from the control array would not help him with his consultations.

Update on Work Products (literature reviews previously commissioned)

1. A second draft of the "Suspended Sediment" was received and is in review.
2. We are still awaiting a second draft on "Fish Behavior Tools."
3. We are still awaiting a first draft of "Fish Behavior."
4. Tom Keegan received a first draft of the Salmon Tracking Study data analysis from UC Davis. After the paper is reviewed by Pete Klimley, it will be disseminated.

Attendees

Bill Brostoff (USACE), Jessica Hamburger (BCDC), Carolyn Box (BCDC), Allison Bremner (USACE), Jessica Burton Evans (USACE), Pete LaCivita (USACE), Ellen Johnck (BPC), David Woodbury (NMFS) (phone in), Tom Keegan (ECORP) (phone in), George Isaac (DFG) (phone in).
