

**HUMBOLDT BAY LONG TERM SHOAL MANAGEMENT  
GENERAL INVESTIGATIONS**

PROJECT LOCATION AND DESCRIPTION: The study area is Humboldt Bay, which lies about 280 miles north of San Francisco, California. Over the last several years, a large volume of shoal material has accumulated along the coast west of the Bay. This shoal material is eventually transported into the Federally maintained Humboldt Bar and Entrance Channels. Unusually heavy shoaling of the Federal channels occurs between the annual maintenance dredging, resulting in deep draft vessel operating restrictions which adversely impact commerce. This study would evaluate long-term solutions to shoaling of the Federal channels.

TOTAL FUNDING:

TOTAL COST:	\$ 3,150,000
FEDERAL COST:	\$ 1,650,000
NON-FEDERAL COST:	\$ 1,500,000
TOTAL FEDERAL COST THROUGH FY 2006:	\$ 237,000
FY 2007 BUDGET:	\$ 0 1/
COST TO COMPLETE:	\$ 1,413,000

FY 06 ACCOMPLISHMENTS: Sponsor is pursuing State sources of financial support for cost sharing the study. In FY06 the Project Management Plan will be revised to reflect any changes to the project and to sign the FCSA.

FY 07 ACCOMPLISHMENTS: If the sponsor elects to pursue the study and Federal funds are provided, those funds will be used to begin feasibility studies, engineering investigations, public scoping and environmental assessment.

ISSUES AND OTHER INFORMATION: The 905(b) analysis indicates a federal interest and need to move forward with the study. The Port of Humboldt is seeking financial support from the State to participate in the study.

CONGRESSIONAL INTEREST: 1<sup>st</sup> District, Rep. Mike Thompson

POINT OF CONTACT: San Francisco District, (415) 503-6720
