

**ESTUDILLO CANAL
GENERAL INVESTIGATIONS**

PROJECT LOCATION AND DESCRIPTION: The study area is located within the City of San Leandro, California about 15 miles southeast of San Francisco. The watershed drains into the San Francisco Bay, with a drainage area of approximately ten square miles. A substantial number of properties within this densely populated area are designated as being in a Federal Emergency Management Agency (FEMA) floodplain. The study will evaluate potential flood damage reduction alternatives in a highly developed area.

ISSUES AND OTHER INFORMATION: FY 03 Congressional add funds were used to initiate the Reconnaissance Study in July 2003 at full Federal expense. FY05 tasks are not funded in the budget. This lack of funding will prevent the initiation of the Feasibility Study in 2005. Ramifications of this study delay are not yet known but have the potential to be considerable.
