

October 8 – November 16, 2019

A Seaweed Sanctuary  
– Art Exhibition –

Josie Iselin and Ellen Litwiller come together with delightful visions of seaweed and the wonders that live within. Although they work in different mediums, both have extensive experience bringing art and science together, Josie's newest book recently out 'The Curious World of Seaweed' and Ellen's exhibit/illustration work for Natural History Museums/publications. Their work engages and challenges the way we can observe, appreciate and learn about the underwater world of seaweed.
