

THE BAY MODEL: A BAY AREA ORACLE

Sat February 23

1:30pm–2:30pm

In commemoration of Engineer Week, this program is dedicated to the USACE San Francisco District's construction of the Bay Model. This former one-of-kind scientific, hydrodynamic, engineering testing facility has accurately produced water related predictions for almost a half century. Although retired now, its story is part of the districts amazing legacy. Join Ranger Linda for more on this story.
