1455 Market Street
San Francisco, CA 94103-1398

Dear Cynthia,

My thanks to you and the entire USACE team working on the Corte Madera Creek Flood Risk Management Project in Marin County. It is an important project that provides the community the opportunity (after decades of chronic flooding) to reduce flood risk for residences, the local business community and critical public infrastructure.

As you are aware, the EIS/EIR for the project was released on October 12, 2018 for a 45-day public review and comment period which would put close of comment on November 27. Given the complexity of the document, and the importance that community stakeholders and interested members of the public have adequate time to review the draft document and provide well informed comment, I respectfully request that the comment period for the Draft EIS/EIR for the Corte Madera Creek Flood Risk Management Project in Marin County be extended an additional 15 days to December 12, 2018 if such an extension can be made without compromising the USACE prescribed Feasibility Study process and ability to meet various required milestones.

I appreciate your consideration of this request.

Sincerely,

Katie Rice

Good morning Ms. Cadden

We appreciate your engagement with feasibility study and environmental impact statement/environmental impact report, and we understand your desire for an extended comment period. We are in fact at a point in the study process when extending the comment period would jeopardize the project timeline and budget, and that is not something we can support.

The US Army Corps of Engineer's planning process is a very rigid one at this point in history. That has not always been the case, as you know, given the long history of the Corte Madera Creek project/study. Historically, studies could go on for many years and spend millions upon millions of dollars. Now, for better or worse, we are strictly held to 3 years and \$3 million, though in some instances we are able to justify a time and / or funding extension.

For Corte Madera, we have in fact received a waiver for the study so that we can spend more funds and take more time than the \$3 million and 3 years allowed. But those funds and that time has already been agreed to by all parties (by our non-federal Sponsor, by the San Francisco District, and by our higher headquarters that grants the approvals in Washington DC). At this point in the life of this study, any delay (even a 15 day delay), will in fact compromise our feasibility study process and our ability to complete the study in the required amount of time.

We understand that time constraints are unwelcomed and we too try to push back on them when we can -- but in this instance, we are asking for your understanding and for your support to stick to the schedule so that we can complete the report on time and take the next step with the recommended plan.

Thank you.

Jaime,

Thank you for your reply to my letter/email of October 19 regarding the Corte Madera Flood Risk Management Project which requested an extension of the public review/comment period for the Environmental Document (EIS/EIR). I appreciate and understand the time and budget constraints the District is operating under, and the fact that this same rigid planning process (eg. 3x3x3) has helped to keep the project development and study process moving forward and relatively on track. As I noted in my letter, I would not want a discretionary delay to compromise the overall schedule and potentially a future project. Hence, I respectfully accept your decision. In addition, I would like to extend my thanks to you and USACE team assigned to this project for your support in the community outreach currently underway towards providing local residents, the business community and other local stakeholders opportunity to learn about the EIS in advance of the public comment deadline. My thanks to all USACE involved in helping with this important outreach.

Sincerely,

Katie Rice

Ms. Vernon,

As the Project Manager for the Corte Madera study I am responding on behalf of the San Francisco District to Supervisor Rice's letter.

We appreciate your understanding and consideration of the Feasibility Study process and milestone schedule, as noted in your letter. We are in fact at a point in the study process when extending the comment period would jeopardize the project timeline and budget.

The Corps planning process is a very rigid one at this point in history. That has not always been the case, as you know, given the long history of the Corte Madera Creek project/study. Historically, studies could go on for many years and spend millions upon millions of dollars. Now, for better or worse, we are strictly held to 3 years and \$3 million (that's fed + non-Fed money), though in some instances we are able to justify a time and / or funding extension.

For Corte Madera, we have in fact received a waiver for the study so that we can spend more funds and take more time than the \$3 million and 3 years allowed. But those funds and that time has already been agreed to by all parties (by our non-Federal Sponsor, by the San Francisco District, and by our higher headquarters that grants the approvals in DC). At this point in the life of this study, any delay (even a 15 day delay), will in fact compromise our Feasibility Study process and our ability to complete the study in the required amount of time.

We understand that time constraints are unwelcomed and we too try to push back on them when we can -- but in this instance, we are asking for your understanding and for your support to stick to the schedule so that we can complete the report on time and take the next step with the recommended plan.

I'd like to follow up with a phone call if you or Supervisor Rice would like to discuss this further. Please let me know if/when you are available for that.

Thank you.

Subject: Corte Madera Creek Flood Risk Management Project – Request to Extend Comment Period

My property is located at [REDACTED], Ross, which is one of the most directly impacted properties by the proposed project. Given the complexity, length and detail of the EIS/EIR it is imperative that the comment period be extended to 60 days so that we have time to get feedback from staff on our questions and concerns and to prepare our comments. The current forty-five day period is not enough time. Everyone I have spoken with in Town feels the same way. Thank you.

Ms. Lopez,

As the Project Manager for the Corte Madera study I am responding on behalf of the San Francisco District to Mayor Kuhl and Mr. Chinn's letter.

We appreciate your engagement with the Feasibility Study, and we understand your desire for an extended comment period. We are in fact at a point in the study process when extending the comment period would jeopardize the project timeline and budget, and that is not something we can support. We have received a similar request from Marin County Supervisor Ms. Katie Rice, and yesterday we sent a similar response.

The Corps planning process is a very rigid one at this point in history. That has not always been the case, as you know, given the long history of the Corte Madera Creek project/study. Historically, studies could go on for many years and spend millions upon millions of dollars. Now, for better or worse, we are strictly held to 3 years and \$3 million (that's fed + non-Fed money), though in some instances we are able to justify a time and / or funding extension.

For Corte Madera, we have in fact received a waiver for the study so that we can spend more funds and take more time than the \$3 million and 3 years allowed. But those funds and that time has already been agreed to by all parties (by our non-Federal Sponsor, by the San Francisco District, and by our higher headquarters that grants the approvals in DC). At this point in the life of this study, any delay (even a 15 day delay), will in fact compromise our Feasibility Study process and our ability to complete the study in the required amount of time.

We understand that time constraints are unwelcomed and we too try to push back on them when we can -- but in this instance, we are asking for your understanding and for your support to stick to the schedule so that we can complete the report on time and take the next step with the recommended plan.

If you would like to follow up with a phone call, we are here to discuss this, as our goal is to be as open and transparent as possible, especially as we near the conclusion of this study. Please let me know if/when you are available for that.

Thank you.

Hi Cynthia,

I'm writing on behalf of the San Francisco Bay Regional Water Quality Control Board to request a roughly one-month extension to the comment period for the Corte Madera Creek Flood Risk Management Draft EIS/EIR. Given the size of the document, the Thanksgiving holiday on Nov 22-23, and staff workloads, we would appreciate an additional month of time to complete our review and obtain input from senior management. Thanks for your consideration.

Best,

Christina
