SUBJECT: San Francisco Waterfront Flood Resiliency Study

Ms. Elaine Forbes  
Executive Director  
Port of San Francisco  
Pier 1, The Embarcadero  
San Francisco, CA 94111

Dear Ms. Forbes:

Section 1002 of the Water Resources Reform and Development Act of 2014 requires the U.S. Army Corps of Engineers District Engineer to notify non-federal sponsors regarding feasibility study milestone schedules for active studies.

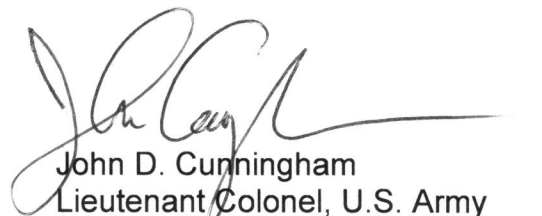

The previously baselined schedule for the San Francisco Waterfront Flood Resiliency Study, consistent with 3x3x3 guidelines, is as follows:

- a. Release of draft feasibility report for public comment and concurrent review – 3 November 2019.
- b. District Engineer submits final feasibility report – 2 April 2021
- c. Signed Chief's Report – 3 September 2021

In light of the scope and complexity of this study, we are developing a request for an exemption from 3x3x3 for both cost and time which would extend the schedule and would need to be approved by the Assistant Secretary of the Army (Civil Works).

If you have any questions, please contact Mr. Patrick McKinley, Project Manager, at 415-503-6731.

Sincerely,

John D. Cunningham  
Lieutenant Colonel, U.S. Army  
District Commander and Engineer
